# Servosteel

## Laser Services

Servosteel's Laser Cutting Service

# Servosteel Laser Services

With the latest addition of a new flatbed Laser to the Servosteel portfolio, we pride ourselves in offering the best service and unrivalled lead times.

Our services include:

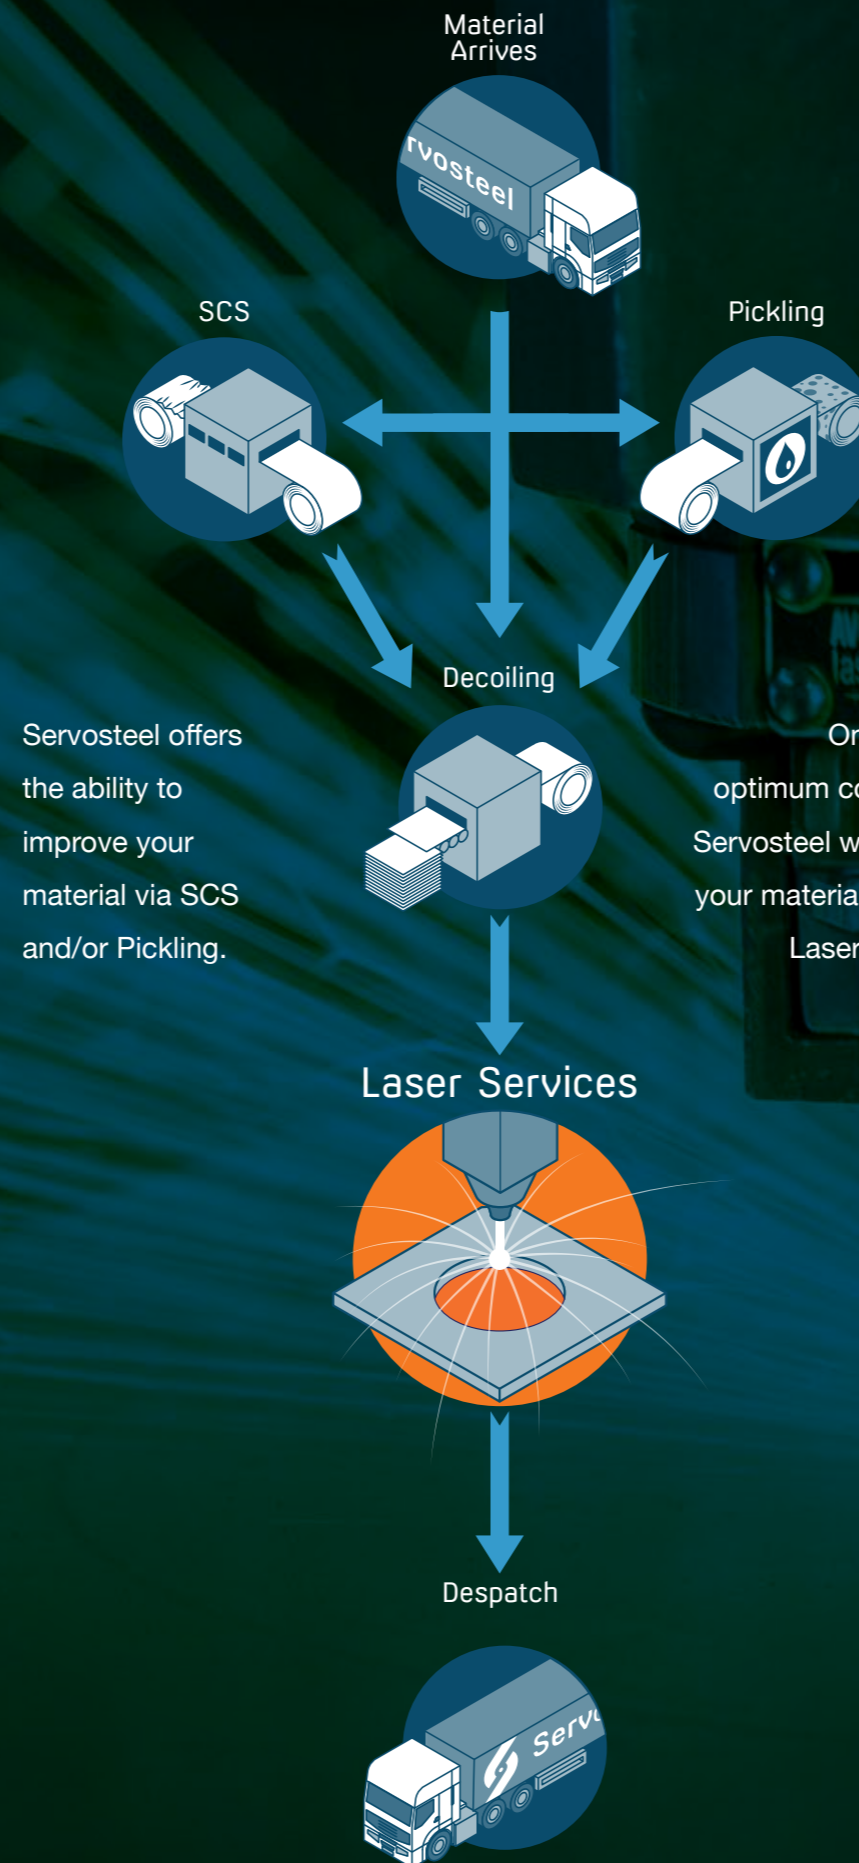

- » Profile cutting
- » Hole piercing
- » Etching
- » CAD/CAM Software
- » Multi format drawing compatibility
- » Complete design and estimation service

# Why Choose Servosteel?

## Our Value Proposition

With extensive product and sector knowledge, meeting the needs of the UK steel industry over the last 30 years, Servosteel remains the UK's leading Toll Processor, offering a globally unique proposition:

- » Toll Processing or Direct Sale
- » One stop processing solution offering improved logistics and reduced costs
- » Interactive online access—Servo Online
- » Unique service capabilities: coil pickling, decolling, slitting and SCS.
- » Short and long-term storage facility

Servosteel offers the ability to improve your material via SCS and/or Pickling.

Once in its optimum condition, Servosteel will decoil your material prior to Laser cutting.
