

Servosteel

# ENVIRONMENTAL AND SUSTAINABILITY POLICY

Servosteel is committed to undertaking its activities regarding the environment by meeting the requirements of ISO 14001:2004 through our established working practices and our commitment to continual improvement. We endeavour to comply with all environmental legislation, regulations and other requirements relating to our activities, with particular reference to:

*Environmental Permitting Regulations (EPR) Permit KP3732PL*  
*MCERTS Self-Monitoring of Effluent Flow*  
*MCERTS Emissions Monitoring from Emissions Point A1 (Permit KP3732PL)*

It is our declared policy to minimise the effects of our activities through environmental and sustainable measures, which will include;

- Assess the effects of our activities on the surrounding environment.
- Be committed to a programme of continual improvement and pollution prevention by:
  - Limiting the amount of waste produced by raising staff awareness through our quality standards which meet ISO 9001:2008, and where waste is produced we work closely with our staff and our fully licensed waste contractors. Servosteel continue to set targets to ensure we can re-cycle and recover as much waste as possible through the waste management hierarchy.
  - Managing the consumption of Energy and Water effectively through a system which constantly measures our usage. The analysis of this information will aid decisions of best practice working techniques and future improvement programmes, in line with customer demand.
- Maintain awareness of any developments designed to improve the environment and apply best available technology where viable.
- Communicate the policy to employees and interested parties through various methods including the use of notice boards, company intranet and our website [www.servosteel.com](http://www.servosteel.com)
- Set definable and measurable Environmental Objectives and Targets.
- Continue to promote and support sustainable travel with continued support for the Cyclescheme and through other external companies.
